### **What you will do**

The process engineer intern is responsible for supporting operations by assisting in process design, optimization, and troubleshooting. You will work closely with the operations team to identify areas for improvement and implement solutions to increase efficiency and productivity.

### **Key Responsibilities**

- Collaborate with cross-functional teams to identify and troubleshoot process issues.
- Develop detailed reports that highlight key performance indicators (KPIs) such as production rates, downtime, yield rates.
- Create and maintain process documentation, including standard operating procedures and work instructions.
- Participate in continuous improvement initiatives and provide suggestions for process enhancements.

### **What we are looking for**

- Strong analytical and problem-solving skills
- Excellent communication and interpersonal skills

Kenvue is proud to be an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, age, national origin, or protected veteran status and will not be discriminated against on the basis of disability.
