

📣 We are proud to announce that under the presidency of our own Professor Dr. Vasilios Spitas, the BAPT 2025 – Power Transmissions International Conference is going to be held at the Eugenides Foundation in Athens this July (9-11th)!

The historic conference will be hosted in Athens, Greece for the first time in over a decade. It's a celebration of the legacy, innovation, and future of Power Transmissions and Mechanical Engineering!

🚀 What's New at BAPT 2025?

For this summer's special edition, traditional topics in power transmissions and mechanical engineering design will be held along with sessions dedicated to the fronts of mechanical engineering research such as Additive Manufacturing, Defense & Space Applications, Sustainability & Circular Economy and Upcycling & Eco-friendly Engineering.

✅ Become a part of strategic discussions on:
Expanding BAPT's scope

Special issues in prestigious journals
Open-access platforms for cutting-edge research
Strengthening collaborations with neighboring countries

Why Attend?

✔ From traditional power transmissions to AI-powered mechanical solutions, bioengineering breakthroughs, and sustainability-driven innovations, BAPT 2025 will challenge and inspire all attendees!

✔ The conference will include a – soon to be announced – Special Issue in collaboration with international Journals in order for the participants to receive proper recognition for their presented works.

✔ Distinguished experts from the Greek and international industrial sector will provide their insights through Keynote Sessions and P2P discussions.

 Whether you're an established expert or an emerging scientist, this is the perfect platform to showcase your work, exchange ideas, and shape the future of our field!

Experience Athens Like Never Before!

Athens, a city that has stood at the crossroads of history & knowledge for millennia, will provide the perfect backdrop for our discussions. Imagine:

-  Deep technical debates by day
-  Exploring the Acropolis & ancient ruins by evening
-  Enjoying the vibrant Athenian Riviera by night

 Mark Your Calendars & Register Now! **Early birds submission April 30th 2025!**
